Core Values

Experience & Innovation

Encore's experience in maintenance of way coupled with our commitment to innovation, make us a valuable addition to your team.

- All of our products are independently tested for quality and durability.
- We have the only true ride-on tie plugger available in the market.
- Our non-pressurized material storage tanks eliminate possible safety hazards when filling.
- Our concrete tie epoxy quickly repairs moderate to deep concrete tie rail-seat abrasion. This two component product has the shortest open time of all similar repair materials on the market.
- Our concrete tie thin epoxy for light concrete tie rail-seat abrasion or new concrete tie application sets up in less than 5 minutes.

The only true ride-on tie plugger available in the market

Core Values

Customer Service

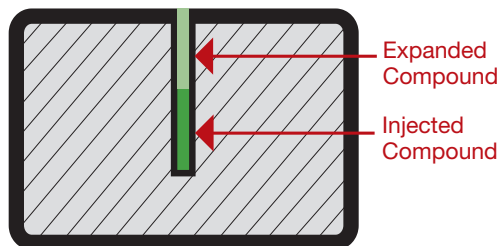

Encore is committed to providing unmatched service, from project inception through completion.

- Encore's knowledgeable staff will help you tailor application equipment with corresponding tie compound requirements.
- Encore has dedicated field support for your initial and recurring training needs, safe equipment operation, maintenance and repair of your application equipment.
- At Encore we have over 70 years of track maintenance experience.

Cost Savings

Encore can save you a minimum of 30%, on your tie plugging total project cost.

- Our 1:1 ratio expansion compound requires the use of less product and provides exceptional holding power and gage resistance.
- Our compound allows you to use 50% less material.
- Our compound extends the life of the tie allowing you to repair the tie instead of replace it.
- Our thin viscosity concrete tie epoxy sets in under 5 minutes, greatly reducing the repair time.
- Our Ride on Tie Plugger costs at least 25% less than other bulk container high production walk behind machines.
- Our ergonomically designed equipment provides operator comfort which increases rail and tie gang productivity.

How Our 1:1 Ratio Expanding Compound Works

Encore is your single source leader for railway crosstie preservation technologies. That's why the largest Class I railroad in North America relies on Encore.

We're your single-source for concrete and wood crosstie repair products and equipment. Call us today!
