

# Concrete Tie Life Extension Equipment and Compounds

## VALUE

Encore's concrete tie life extension equipment and compounds are manufactured for efficiently repairing and preventing rail seat degradation. Our equipment makes the application of our compounds safe and fast. LV Epoxy is formulated to repair lighter rail seat degradation and can be applied manually. The HV Epoxy is made to repair heavier rail seat degradation. SpeedSet® is UV cured epoxy that makes preventing rail seat degradation a fast and easy process. SpeedSet® can be applied in Tie Plants as well as in the field.

## COMPOUND

Encore's LV Epoxy comes in 600ml Cartridges. HV Epoxy comes in five gallon pails. SpeedSet is packaged in 5 gallon pails and 115 gallon totes.

**600ml LV Cartridge**  
(12/case)

**5 Gallon HV Epoxy Pails**

**5 Gallon SpeedSet Pail**

**115 Gallon SpeedSet Tote**

## EQUIPMENT

Encore has a variety of equipment to meet your production needs. Including ride-on, walk-behind and smaller skid mounted equipment to fit in the back of a high-rail vehicle. Encore also designs application systems for any concrete tie plant process.

**Walk-behind HV Machine**

**SpeedSet Add-on for Ride-on Tie Plugger**

**SpeedSet Tie Plant Application**
